Project 2: To Do App - Maya and Alex 2022

JUST DO IT

JUST Try our App!

: was to create a to do list app for teacher's. The app has to allow the teacher to log in and be able to see their individual tasks. It also needs to display up to 10 completed tasks. There is also an added feature for sharing tasks where the user would be able to see who they shared their shared tasks with them.

ring especially when there are a lot of them. Therefore, we wanted our app to have a more calming approach and minimal interfaces to lower ed. We also felt that by adding "JUST" in front of every functionality that our app has, it adds emphasis on the need to do it and complete it. I past procrastination of completing a task.

o understand that it is okay to start all over again rather than being stuck in a vicious cycle where we don't understand anything. It also show k the project down in little pieces instead of looking at the project as a whole. It also taught us that databases aren't as abstract as they seem common logic to solve problems that seem overlyh complex.

PHOTO COMPOSITE

This project was a composite photo illustration created in Adobe Photoshop. It consists of various photographic elements merged together into one single photo-realistic illustration. I used a combination of license-free stock images From pexels. Composition, visual conception, colour palette and overall integration through color, texture, light and shading, will all be considered when evaluating this assignment.

AWARENESS POSTER

The objective of this assignment was to create a conceptual poster to invoke awareness about the health of the oceans. Through your research identify the problem and create a poster demonstrating either the problem or a solution.

TO DO LIST

The point of this project was to create a to do list app.

The Mandate was to be able to create an account using a username
Allow us to log in or identify ourselves in the system with our username
Display the list of our individual “to do” tasks
Display a list of our 10 last completed tasks
Add a new task to the list
Provide a checkbox or a button to be able to mark a pending task as completed
